PROJECTS:

Meet.Sup? --A Meetup-inspired application built with React and Ruby on Rails

Live: <https://meetsup.herokuapp.com> • Repo: github.com/pdcloeter/meetsup

- Leveraged complex Active Record relationships with Jbuilder to minimize database queries, yielding faster application performance
- Extensively utilized CSS3 Flexboxes and the z-index property to enhance user's visual experience
- Employed use of BCrypt gem and constructed full authentication pattern, providing secure account sign up and login

SequentialSounds --An 80's-themed audio sequencer built with JavaScript

Live: <https://pdcloeter.github.io/SequentialSounds> • Repo: github.com/pdcloeter/SequentialSounds

- Utilized vanilla JavaScript and object-oriented programming to create an engaging audio application
- Researched and implemented use of the Tone.js library to interface with the Web Audio API
- Designed using CSS3 animations and effects for a fun, interactive user experience

WORK EXPERIENCE:

What's The Benefit? inc. 501(c)(3), New York, NY Jan 2010 – Aug 2018

Co-Executive Director

- Managed teams and contracted artists (30+ people) to execute large-scale **Broadway** benefit planning: celebrity speakers, entertainment, insurance, rentals (1000+ attendees)
